

IWCF AGM & WELL CONTROL WORKSHOP 2019

29TH TO 30TH OCTOBER

SHERATON IMPERIAL KUALA LUMPUR HOTEL

ANNUAL GENERAL MEETING

The morning session of the 29 October 2019 includes a welcome from Mr Zdenek Sehnal (IWCF Board Chairman), AGM formalities and concludes with a question and answer session.

SESSIONS

1

OPENING OF WORKSHOP

IWCF's Chief Executive Officer Antony Quin will give an overview of the workshop activities and the importance of collaborating with our members and the industry to deliver our mission.

2

HUMAN FACTORS

We will explore human factors and ask "With the increase in simulation training, how do we train our simulator instructors to make the most of immersive simulation?"
Speaker: Robin Adlam

3

ENHANCED WELL CONTROL

This session will focus on the impact Enhanced Well Control training has had on improving crew competency and demonstrate how this recently helped avert disaster.
Speakers: Kim Laursen and Bruce Worthington

4

IOGP WELLS EXPERT COMMITTEE UPDATE

This session will investigate how the industry can collaborate to successfully integrate IOGP Report recommendations within well control training.
Speaker: Olav Skar

5

WELL INTERVENTION PRESSURE CONTROL

This session will discuss the recent update to our syllabi and display incident statistics which demonstrate that pressure control continues to account for a large number of well control incidents.
Speakers: George Galloway and Bob Baister

6

ASSESSOR AND INSTRUCTOR COMPETENCY

Here we will look at ways we can address the challenges of developing, verifying and maintaining competency with practical assessors and instructors.
Speakers: Malcolm Lodge and Vitaly Baranov

WORKSHOPS

After listening to presentations from our expert speakers, the workshop sessions will provide an opportunity to interact and participate in discussions.

29th October 2019

HUMAN FACTORS

What obstacles do we need to overcome to fully embed human factors into well control training?

How can we ensure instructors and assessors are qualified to assess non-technical skills?

ENHANCED WELL CONTROL

Importance of integrating human factors in well control training.

How can enhanced training be made more accessible?

WELL INTERVENTION PRESSURE CONTROL SYLLABI UPDATE

Raising the standards and ensuring the industry is ready for change.

What are the needs of the industry?

Continuous improvements and introduction of practical assessment.

RAISING THE STANDARDS OF ASSESSORS AND INSTRUCTORS

What challenges do we currently face?

How can we add value to the 5 day practical assessor course?

How can we enhance and improve quality of training

30th October 2019
